**FOR IMMEDIATE RELEASE**

## **Right Hemisphere Honored with Third Consecutive MT2 Award for Its Impact on the Military Training Community**

**Fremont, CA — November 14, 2006** — Right Hemisphere®, the leading provider of Product Graphics Management (PGM) software, today announced it has been honored for a third consecutive year by Military Training Technology magazine for its technology contributions to the military training community. Right Hemisphere was selected by the magazine’s editorial board and a panel of independent experts to receive a 2006 MT2 Top 100 award in the “Up and Coming” category, which designates companies that are rising stars in the simulation and training industry.

“Our software facilitates more effective knowledge transfer,” said Right Hemisphere Director of Marketing Jack Johnson. “From our enterprise Deep Server software to our Deep Creator interactive 3D authoring software, we have a portfolio of software that helps defense and civilian organizations alike create rich 3D training materials that more effectively teach people to assemble, use, and repair today’s complex equipment. With our new support this year for interactive 3D PDF template building and publishing, content developers can build training content without even knowing any JavaScript programming and publish it to a secure PDF that can be accessed virtually anywhere. We thank Military Training Magazine for recognizing this powerful advancement.”

Military Training Technology is a magazine dedicated to military training as a critical component of command readiness and service transformation. The annual MT2 Top 100 awards program is open to any company to apply. The magazine and its publisher, Kerrigan Media International Inc., also invite more than 300 candidates each year to submit entries for consideration. Award recipients are selected based on criteria such as total military sales, end-user feedback, innovations, and the need for the candidate’s solutions.

## About Right Hemisphere

Right Hemisphere is the leading provider of Product Graphics Management (PGM) software, a new category of enterprise software. PGM enables manufacturers to globally source, sell, and service products more effectively by delivering the right 2D and 3D product graphics, in the right format across their extended enterprises, all from accurate, up-to-date engineering data readily available in current CAD and PDM systems. Only Right Hemisphere lets you capitalize on your existing investments in 3D CAD and multimedia communications, while replacing today's manual product communications processes. With Right Hemisphere you can turn your product communications such as RFQs, catalogs, manuals, courseware, collateral, IETMs, and more, into competitive advantage. Over 500 innovative manufacturers, including five of the top six automotive OEMs and nine of the top 10 U.S. aerospace and defense contractors rely on Right Hemisphere to dramatically accelerate time to market, increase product and services revenues, and lower product communications costs.

Founded in 1997, Right Hemisphere is a privately-held, venture-funded corporation based in Silicon Valley and Auckland, New Zealand. For more information please visit [www.righthemisphere.com](http://www.righthemisphere.com) or call toll free at (877) 309-3204.
