MEDIA ALERT

Corel Unveils its New Technical Illustration Suite Featuring Right Hemisphere's Deep Exploration Software

Pleasanton, CA — July 23, 2008 — Right Hemisphere®, the leader in visual product communication and collaboration solutions, today announced that Corel Corporation (NASDAQ:CREL; TSX:CRE) has unveiled its Corel DESIGNER® Technical Suite X4 software featuring a special version of Right Hemisphere's client software, called Deep Exploration™ 5.5 CSE. Right Hemisphere's Deep Exploration software gives Corel DESIGNER users the ability to quickly and easily transform 3D CAD models and publish them into accurate 2D graphics without having to purchase additional CAD software.

More specifically, with Deep Exploration 5.5 CSE included in Corel DESIGNER Technical Suite, Corel users can:

- Access 3D designs from AutoCAD® DWG™ and DXF™, 3DS, VRML, U3D, SketchUp™ and other formats
- Modify 3D models and views to accommodate the needs of a technical illustration by applying cross sections and exploding models to create disassembly views
- Quickly transform 3D CAD models into accurate 2D vector illustrations and insert them directly into Corel DESIGNER X4
- Create renderings from 3D designs to output directly to Corel PHOTO-PAINT® for professional retouching and integration in technical documents and presentations

With an upgrade to Right Hemisphere Deep Exploration 5.5 CCE, Corel DESIGNER users gain additional:

- Support for over 80 3D file formats, including support for native 3D CAD applications such as CATIA®, Inventor®, Pro/ENGINEER®, SolidWorks®, and NX® (Unigraphics)
- 3D PDF publishing capabilities
- 3D CAD tools to optimize 3D files for display and manipulation, such as polygon reduction tools, small parts removal and more

Unveiled last week and immediately available, the Corel DESIGNER Technical Suite X4 enables users to create technical documentation, instructional manuals, maintenance references and technical diagrams with exceptional precision and speed. To learn more about Corel DESIGNER Technical Suite or to download a trial version, please visit www.corel.com/designer.

About Right Hemisphere

Right Hemisphere is the leading provider of enterprise visual product communication, collaboration and publishing solutions. The company's software and solutions help Global 1,000 manufacturers to optimize their mission critical business processes such as sourcing, manufacturing, marketing and customer support. The software does this by integrating disparate product data readily available in corporate CAD, PLM, and ERP systems. It then automatically delivers this intelligent product information into commonly used business documents, file formats and even directly into business applications for secure downstream use anytime, anywhere. Founded in 1997, Right Hemisphere is a privately held, venture-funded corporation based in Silicon Valley and Auckland, New Zealand. For more information please visit www.righthemisphere.com.
