**FOR IMMEDIATE RELEASE**

## **InterDoc and Right Hemisphere Team Up to Bring State-of-the-Art 2D and 3D Publishing Solutions to Canada**

*Largest ECM Specialist in Canada to Sell, Implement, and Provide First Line of Support for Right Hemisphere PGM Software in Canada*

**Montreal, Canada and Fremont, CA — September 25, 2006** — InterDoc and Right Hemisphere announced a partnership today to bring advanced 2D and 3D publishing solutions to Canadian manufacturers. Through InterDoc—a large Canadian solution provider specialized in business process management (BPM), knowledge management (KM) and system innovation—Right Hemisphere’s Product Graphics Management (PGM) solutions will be available to Canadians for the first time. InterDoc will sell, implement, and provide the primary line of support for Right Hemisphere’s software in both Canada and the Northeast region of the U.S.

“In order to expand our market presence outside of North America, we need to partner with leading value added resellers with integration expertise,” said Randy Ochs, vice president of strategic alliances and channel development. “We’re systematically selecting very strong, highly skilled partners to work with in key geographies. As part of this effort to expand our business to new territories, we looked no further than InterDoc to represent us in Canada. InterDoc is well-known and respected there, and an acknowledged expert in ECM solutions. We feel very comfortable with InterDoc representing us in Canada and look forward to their help servicing some of our Northeast-based accounts.”

“This agreement with Right Hemisphere is a great opportunity for us to introduce Canadian manufacturers to the power of PGM solutions which can take enterprises to a higher functioning level,” said Danny Boulanger, president and CEO at InterDoc. “New software from Right Hemisphere and Adobe now offer manufacturers the ability to share, markup, reuse, and collaborate with product

data in 3D in a ubiquitous PDF. This is truly revolutionary and already receiving a very warm reception from our customers.”

Both Right Hemisphere and InterDoc have agreements in place with Adobe Systems Incorporated to address the need for document-based communication of 3D data across extended enterprises. By combining the strengths of these companies, Right Hemisphere and InterDoc will help customers optimize a variety of high business value scenarios around engineering data workflow to improve time to market and quality, while reducing costs.

Leading manufacturers such as DaimlerChrysler, Sikorsky Aircraft, Bell Helicopter, and Halliburton have deployed Right Hemisphere’s flagship Deep Server™ enterprise PGM software. Deep Server is implemented to quickly automate graphics transformation and authoring, and to optimize the graphics publishing processes for product communications and support offerings. Deep Server is unique in its support of over 120 2D and 3D file formats. The software also provides a unified repository to easily retrieve data, has a searching interface as easy to use as Google® and a secure and managed environment for proprietary data and access control. For more information about Deep Server, visit <http://www.righthemisphere.com/products/dserv/index.htm>.

### **About InterDoc**

Founded in 1995, InterDoc is a North American leader in business architecture, with a specific focus on business processes improvement and operational performance. InterDoc is also the largest Canadian firm specializing in Enterprise Content Management which includes business process management, electronic document management, enterprise information integration, XML applications, records management, imaging, workflows, and more. The company serves the aerospace, pharmaceutical, financial, manufacturing and utilities industries and offers a full spectrum of solutions, services, and products to help its customers draw business-critical value from information technologies. For more information on the company, please visit, [www.interdoc.com](http://www.interdoc.com).

### **About Right Hemisphere**

Right Hemisphere is the leading provider of Product Graphics Management (PGM) software, a new category of enterprise software. PGM enables manufacturers to globally source, sell, and service products more effectively by delivering the right 2D and 3D product graphics, in the right format across their extended enterprises, all from accurate, up-to-date engineering data readily available in current CAD and PDM systems. Only Right Hemisphere lets you capitalize on your existing investments in 3D CAD and multimedia communications, while replacing today's manual product communications processes. With Right Hemisphere you can turn your product communications such as RFQs, catalogs, manuals, courseware, collateral, IETMs, and more, into competitive advantage. Over 500 innovative manufacturers, including five of the top six automotive OEMs and nine of the top 10 U.S. aerospace and defense contractors rely on Right Hemisphere to dramatically accelerate time to market, increase product and services revenues, and lower product communications costs.

Founded in 1997, Right Hemisphere is a privately-held, venture-funded corporation based in Silicon Valley and Auckland, New Zealand. For more information please visit [www.righthemisphere.com](http://www.righthemisphere.com) or call toll free at (877) 309-3204.
